SAKTIKANTA DHAL

Automation Test Engineer | Playwright | Selenium | API Testing | 4+ years

sd.saktikd@gmail.com +91-8984544992 Bangalore, Karnataka

SKILLS

- **Automation Tool**: Playwright, Selenium WebDriver
- **Languages**: Java, JavaScript, TS
- **API Testing**: Playwright API Testing, Postman, Swagger
- **Frameworks**: Cucumber BDD, Page Object Model
- **CI/CD**: GitHub Actions, Jenkins
- **Database**: MongoDB
- **Tools**: JIRA, GitHub, Bitbucket
- **AI-Assisted Development**:

- **ChatGPT** (GPT-4/5), **Cursor AI agent** for test automation development
- **Prompt Engineering** for generating optimized test scripts and **reusable components**
- **AI-assisted** framework **optimization** and **debugging** and test **planning**

KNOWLEDGE PURVIEW

Playwright (JavaScript / TypeScript)

- UI Automation & API Automation
- Playwright Request Context (API Testing)
- Storage State & Session Management
- OTP-based Authentication Handling
- Parallel Test Execution
- Test Hooks & Fixtures
- JSON Test Data Handling
- Cross-Browser Execution
- Page Object Model (POM)
- Test Data Management
- Allure Reporting
- CI/CD Integration using GitHub Actions

Selenium WebDriver (Java) - UI Automation

- BDD Framework using Cucumber
- Page Object Model (POM) Implementation
- Functional & Regression Test Automation
- Reusable Test Script Development

EDUCATION

Eastern Academy of Science & Technology,
Bachelor of Technology (B. Tech.)
2016 | Bhubaneswar, India
Odisha

Automation Test Engineer with **4+ years** of experience in software testing, including **2 years** specializing in **UI and API** automation using **Playwright (JavaScript/TypeScript)**. Skilled in building scalable automation frameworks from scratch, automating **end-to-end workflows**, and validating **APIs** with exposure to **AI-assisted development** for improving productivity and framework maintainability. Experienced in **Selenium WebDriver (Java)** with **Cucumber BDD** and Page Object Model (POM) and proficient in integrating automation suites into **CI/CD pipelines**.

WORK EXPERIENCE

QUALITYKIOSK TECHNOLOGIES PRIVATE LIMITED **June 2024 - Present**
Project: CRM Domain

- Designed and developed a scalable **Playwright automation** framework from scratch for UI and API testing, leveraging AI-assisted development (**ChatGPT**, **Cursor**) to accelerate implementation, achieving **70% automation coverage** across critical business workflows.
- Executed comprehensive Sanity and Regression test suites covering end-to-end user flows, **reducing manual regression effort by 60%**.
- Performed backend data validation using **MongoDB** to ensure end-to-end data integrity across systems.
- Implemented parallel test execution and intelligent retry mechanisms, **reducing regression suite runtime by 40%**.
- Managed **authenticated session handling** using Playwright Storage State, improving test stability and **reducing flaky failures by 45% in CI pipelines**.
- Enabled cross-browser and headless test execution to improve test coverage and execution efficiency.
- Integrated automation suites with **CI/CD pipelines (GitHub Actions)** for continuous and scheduled execution.
- Integrated **Allure Reporting** with automated **screenshot, video capture, and Playwright trace** on test failures to enhance traceability and debugging efficiency, leveraging **GCP log analysis** for faster root cause identification.

NIV-TECH SOLUTIONS PRIVATE LIMITED **July 2022 - June 2024**
Project: Real Estate Technology Domain

- Took full ownership of a core module by designing and developing UI automation scripts using **Selenium WebDriver (Java)** with Cucumber BDD framework, achieving **90%+ functional test coverage** and **reducing manual validation effort by 60%**.
- Optimized automation across multiple modules by implementing **deep linking strategies**, debugging flaky test scenarios, and refactoring reusable components, **reducing false failures by 40%**.
- Designed and executed detailed test cases and scenarios based on business requirements and acceptance criteria as part of **STLC activities** to ensure comprehensive functional coverage.
- Participated in **pair testing sessions** with developers and QA team members to collaboratively identify defects, validate complex workflows, and improve overall test coverage.
- Performed functional, **regression**, **smoke**, **sanity** and conducted **exploratory** testing to uncover hidden defects and edge cases not covered by predefined test cases.
- Logged, tracked, and validated defects using JIRA, collaborating with development teams for timely resolution.
- Contributed to **Agile SDLC** processes by participating in sprint planning, backlog refinement, sprint reviews, and retrospective meetings while supporting test planning and execution activities.

ALBERTSONS INTERNATIONAL PRIVATE LIMITED **Feb 2019 - July 2022**
Role - Sr. Service Engineer (Non IT)
